English

ABOUT ME

Final-year Software Engineering student at the Polytechnic Faculty, University of Zenica, seeking an internship. Experienced in building web and desktop applications with Java, Spring Boot, C#, React, and relational databases. Enjoy working in collaborative teams, picking up new tools quickly, and taking on practical development challenges.

PROJECTS

LD-Rental — In Progress

Team Lead & Scrum Master · Rent-a-Car Desktop Application · GitHub Actions
Technologies: Java, JavaFX, MySQL

- Building a desktop management application for an active rent-a-car agency to handle fleet tracking, reservations, and daily operations.
- Leading the development team as Scrum Master, organizing sprints and task workflows while maintaining automated CI/CD pipelines via GitHub Actions.

AI Shop — github.com/fatmir12

E-Commerce Web Application with Integrated AI Assistant
Technologies: Java, Spring Boot, React, JavaScript, MSSQL

- Developed an online store featuring an integrated AI assistant that helps users search products and receive tailored recommendations.
- Implemented product catalog browsing, shopping workflows, and backend REST API integration.

AI Finance Manager — github.com/fatmir12

Personal Finance Tracker with Integrated AI Assistant
Technologies: Java, Spring Boot, React, JavaScript, MSSQL

- Built an application for tracking personal income, expenses, and spending categories.
- Integrated an AI assistant to summarize spending habits and help users plan budgets.

Eventify — github.com/fatmir12

Event Management & Scheduling Application
Technologies: React, Node.js, JavaScript, Express.js

- Created an event management platform supporting event creation, scheduling, and participant organization.

MojTeren — github.com/fatmir12

Sports Field & Venue Booking Platform
Technologies: React, Node.js, JavaScript, Express.js

- Developed a booking application enabling users to browse available sports venues and reserve time slots.
